- Ukrainian (C2, Native)
- Russian (C2, Native)

PROFILE

I'm a software engineer with more than half of year of commercial experience in web development. My commercial experience is building complex SSR applications using the Nuxt.js (Vue) framework.

WORK EXPERIENCE

Strong Junior Frontend Developer

Market Making Pro (MMPRO)

05.2023 to present

Development and support of company products, organizing the complex structure of Nuxt.js applications, working with data.

Intern Frontend Developer

HYS Enterprise

08.2022 to 01.2023

Development, construction and maintenance of the correct and complex structure of your own Angular applications, working with APIs.

SPECIALIZATIONS

- Creating responsive websites using mobile first/desktop first technique
- Development of SPA and SSR applications based on Angular/Vue/Nuxt
- Working with deployment platforms (Netlify, Firebase, Cloudflare and others)
- Using project management tools (JIRA etc.)
- Assessing the complexity of tasks and taking responsibility for them

PROJECTS

MMPRO Main Website

Main website project representing the MMPRO company and its services. The project supports multilingualism and also adapts to all possible screen resolutions.

Responsibilities: Expanding the project (adding new pages and content for them), setting up routings, refactoring code, debugging, adding new features and improving old ones.

Technologies used: Nuxt.js, i18n, Webpack, BEM, SCSS

EDUCATION

- Lemon School

Certified Trainee Specialist (11.2021 - 01.2022)

Learning the basics and technologies of Frontend development and learning the necessary skills.

- HYS Enterprise

Qualified Junior Specialist (09.2022 - 01.2023)

Training and professional development in the field of Frontend development. Detailed study of the basics of HTML, CSS/SCSS, JavaScript, TypeScript and Angular.

MMPRO Trust Website

A company project representing the Trust division. The project advertises and presents tradable shares and NFTs of large crypto companies. The project is also multilingual and is translated into English and Chinese.

Responsibilities: Setting up the project configuration, complete project redesign and adaptation for different screens, adding SEO information. Debug, adding new features, code refactoring.

Technologies used: Nuxt.js, i18n, Webpack, BEM, SCSS
